Wednesday 15th March 2023

When we got home from school. I spoke to John personally about what happened today in the toilets. I asked him over and over again the same questions and he kept telling me the same thing over and over again. Below is a summary of what John had told me.

John said he went to the bathroom for a pee. A boy called Oliver came in after him. Oliver flooded the sink with water and pushed the green soap into the water. Oliver mixed the soap up to make green soapy water. John said that he washed all the soapy water away. John then left the bathroom as lunchtime play was nearly over.

I am a bit confused on how Mrs Carter got involved, but John mentioned that later on Mrs Carter asked John to clean up the mess.

John was and still is adamant that he did not make the mess in the bathroom and that Oliver did it all.

I also spoke to John about what happened at the end of the day with his water bottle. John said he dropped it out of his hands and it fell on to the floor and spilled a little bit. Quite honestly I think this was an accident. John said that he cleaned it up himself with paper towel, without anyone telling him to do it.

I would like to add that I also want to know more about Mrs Raife role at the school and what she does with John when she takes him out of class into the sunshine room. To be honest if it wasn't for John mentioning it in the first place (some time ago), we would probably not have known about this at all. Please can you in the future keep us informed about all developments and changes that are being made or you are planning to make regarding John.
